

VOGTLAND ®

Vogtland North America
43391 Business Park Dr. C-10
Temecula, CA 92590
Info: 951-694-6981

IMPORTANT

Please Read Before Installation

Vogtland manufactures many different types of suspension, including coil springs and shock absorbers. If the application is not specific for your make and model, installation and operation could result in property damage and/ personal injury. Please contact your Vogtland dealer, or licensed mechanic with experience in installing suspension if you are not sure of appropriate fitment.

Use caution when removing and installing suspension springs. Springs under compression have a tremendous amount of energy that if handled improperly could result in damage to property and or personal injury. Vogtland suspension should only be installed by a licensed mechanic with experience in installing suspension components.

Ride height may vary as some vehicles have a factory sport suspension and other various accessories.

Please remember that whenever changing the vehicles ride height the alignment needs to be checked.

Spring Notes, Vogtland Springs have markings which designate front and rear spring.

FRONT Springs are marked with a "VA"

REAR Springs are marked with an "HA"

If you need any additional assistance or have any questions, please call Vogtland and speak to one our technicians.

Thank you for purchasing our products!!
